

Through this initiative I have been taught a lot of skills which I can use to liberate myself from poverty and with the stipend I get ~~to~~ I can assist my family with the basics of the household also schooling for my kids

Knowledge ~~is~~ that we possess now is like wealth because I now ~~have~~ ~~me~~ will no longer have to go and buy vegetables as I now know how to plant and take care of my garden this is a huge achievement for me, looking at the country's need for agriculture it will help me transfer knowledge to others as I also been helped by this project so it will be best for me to teach others

I thank such projects in our country ~~as~~ I'm so much grateful for the opportunity granted to learn how to:-
- make charcoal
- make compost etc
